

Glasswool

 Metal Building Insulation - MBI

Factoryboard®

Factoryboard® will reduce thermal heat transmission and as a result will reduce power consumption significantly. Insulating metal buildings is essential and helps stabilise the structures interior temperature.

Key facts

- Excellent thermal and acoustic properties
- Maintenance free
- Long product life - will not readily age

- Significantly reduces heat loss/gain
- Made to size to reduce wastage.

Marketing description

Factoryboard® is a rigid board manufactured from noncombustible Glasswool insulation. Available in 25, 40 or 50 mm thickness. It can be supplied with an ASTM E-84 tested reinforced foil or white metalised foil. Alternative facings are also available (white embossed vinyl or black non-woven glass tissue).

Packaging

Name	SKU	Length (mm)	Width (mm)	Thickness (mm)	R-Value (m2.K/W)
Factoryboard® (Foil)	10716	2400	1200	25	0.78
Factoryboard® (Foil)	14691	2400	1200	50	1.56
Factoryboard® (White Metalised Foil)	11365	2400	1200	25	0.78
Factoryboard® (White Metalised Foil)	14690	2400	1200	50	1.56
